

SharePoint Extranet/Intranet with Hummingbird Integration

How can you make your law firm more effective? By reducing the time attorneys spend on administrative tasks; by making information easily accessible to attorneys; by providing Partners a dashboard that tracks critical indicators that capture the health and progress of the firm; or perhaps by increasing attorney retention. Whatever your firm's legal specialty, the answer to one or more of these issues might hold the key to more clients, higher revenues or better profits.

Leverent allows customers to take advantage of their investment in Hummingbird document management solutions and Microsoft SharePoint Portal to create Intranet and Extranet solutions within weeks. The comprehensive Hummingbird integration provides customers a way to leverage the capabilities of SharePoint, while still utilizing their existing Hummingbird document management system. This "plug-in" strategy is accomplished via two primary mechanisms:

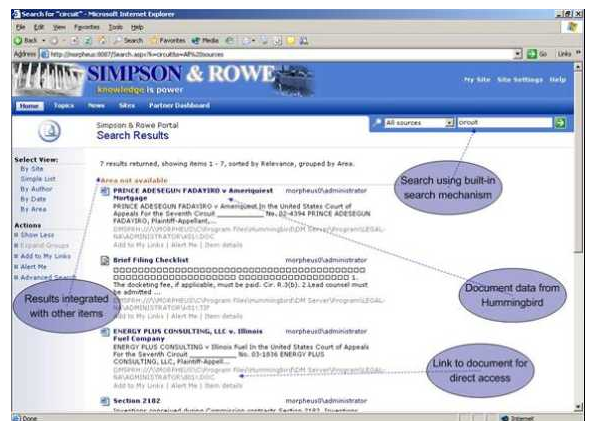

- Hummingbird Integration via Protocol Handler
- Microsoft SharePoint Web Parts for Hummingbird that allow advanced search capabilities, client/matter organization, site provisioning, etc.

In addition, the integration accommodates the security provisions that are provided for in the Hummingbird repository, and also supports the capabilities for multiple libraries across multiple servers and environments. In essence, the solution includes the following capabilities:

- Create and edit documents
- Search for and view documents
- Collaborate on/Share documents
- View document details and history

Leverent incorporates the capabilities mentioned above and many more features to provide an Extranet and Intranet solution. The Intranet solution includes SharePoint portal web-parts for Hummingbird and the Hummingbird protocol handler for integration with your document repository. The Extranet solution includes the Intranet components and a host of other features and capabilities that allow law firms to create, provision and manage Extranet sites for clients or co-counsel.
